

TESTIMONIALS FROM THE EVENT TECHNOLOGY SPECIALIST TEAM

I am a University of Portsmouth Graduate, fast approaching my 5th year at Crystal Interactive Meetings. I started my career at Crystal with a limited understanding of meeting interactivity and engagement but had a well-rounded knowledge of technology and its' practical uses. Within my first month at the company I shadowed colleagues at events in London, Istanbul, and Berlin; I have now travelled the world and visited places like Rio, Seoul, Cape Town, Kuala Lumpur, and Mexico. I have had multiple trips to Europe and the United States... and many other locations!

Within my first 6 months I was delivering my own events, albeit somewhat simpler jobs than my more experienced colleagues. The bonds that are formed working within the team are concrete and give you the confidence to go out into the world and meet challenges head on. You always know there is a support network behind you and the combined experience amasses to decades.

5 years on I have worked with CEO's at FTSE100 companies, worked with a variety of celebrities and even provided technology at private birthday functions. The exposure to different types of clients and events is unparalleled and I have enjoyed finding solutions, overcoming challenges and ensuring events are delivered seamlessly.

I spend my time travelling the world and working with new and interesting people. The team at Crystal I work with are now family and we support one another to be industry leaders in the delivery of event technology solutions.

Harry - Music and Sound Technology

Crystal Interactive Meetings is a unique and innovative company with an exciting working environment. One day you can be on the other side of the world working in a major conference. On another day, you can be in the office garden playing volleyball. Each day truly brings something new! The best part about Crystal is the people you work with. There is a very friendly and family like atmosphere within the office. Everyone is here to help, and there is a strong focus on team spirit.

The job role is fun but at times it can also be challenging. You will encounter stressful situations and get thrown a few curve balls from time to time, but these are all learning experiences that will help you develop. If a problem should occur, you will always have support and backing from the team.

I have enjoyed my time at Crystal and would recommend the role to anyone who is eager to learn and likes a challenge!

Pabel – BEng Electronic Engineering

Working at Crystal Interactive Meetings for the past year and a half has been a great experience. It really is a team environment with an unbelievably friendly atmosphere. The skills and knowledge I have acquired help me to thrive in a highly technical and dynamic role.

The range of products you get to deal with means you are not doing the same thing day in day out. The biggest plus from this job is the travelling, the places you get to see can be incredible.

As someone who has always enjoyed talking to people, working in a client facing environment enables me to continue building on my interpersonal skills. We are encouraged to do this as this benefits the business as we build long lasting client relationships. As the role involves being in and out of the office, it creates a balance that I very much enjoy rather than being behind a desk all day.

I would highly recommend Crystal Interactive to anyone with a creative, technology focused background who enjoys working with people in and out of team based scenarios.

James - BSc Motorsport Technology

I've been at Crystal Interactive Meetings for 7 months now and I couldn't be happier with the experience and the challenges that I've faced. I never thought I'd be delivering key events and conferences for such high-profile clients and senior individuals. There is a lot to learn within this job and the standards are so high with regard to delivering successful events for clients. It is truly satisfying when you deliver a successful meeting.

You're placed within a friendly and supportive environment where you can learn in your own space and test all the products, and you will always learn on the job so you'll always pick up something you didn't know before. The role itself is technical and challenging so you'll be given excellent training and support to help you understand how the products work. I come from a video production background but I believe that if you have any technical background then you'll adapt well to this role.

I've been to countries which I thought I'd never visit such as Monaco, Madrid, Milan, Vienna, Copenhagen and more so there is a lot to see on your travels. Another important factor for me is working with good people so I'm very lucky to have such a friendly environment with great personalities which only helps me express myself in the role.

Anyone that comes into this role will always be supported by the team and you'll find yourself growing in the job and becoming more confident when dealing with high pressure situations. It is definitely a job that comes around rarely and has a great mix of everything so make the most of it!

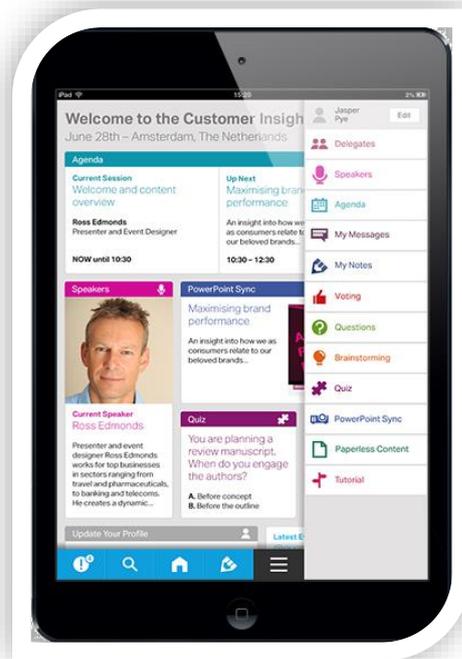

Joe – BA Digital Film Production and MA Digital Media

Having worked for an event production company before joining Crystal Interactive Meetings I knew 'desk jobs' weren't for me. I really enjoy the variety of work and opportunities that keep you on your feet and away from the same desk in the same office every day.

The travel has allowed me to see some places that I otherwise would not have had a chance to see, and the people that work here have become good friends. There is never a time where you think "I wish I hadn't been assigned to work with that person".

The Event Technology Specialist role allows you to develop so many skills, from the IT and Technology side of things, all the way through to working with big corporations, and clients from very high up within those businesses. I've developed all sorts of skills in my 2 years at Crystal interactive Meetings and we're always encouraged to keep learning and improving, backed up by our incredibly supportive managers.

Mark - BA Computer Games Design

COMMENTS FROM OUR CLIENTS.....

Harry was wonderful onsite, excellent in his role and always offering to help our team in any area he could. We valued his support and efficient work and our team knew the voting aspect of the meeting was in very capable hands allowing us to focus on areas we needed to.

I have always had fantastic service from Crystal Interactive Meetings and continue to use you for that reason! Thank you

I'm just writing to thank you for all your time and hard work during our Conference over the last 2 days. It has been a joy to work with such a professional... throughout all our changes! You are a great ambassador for your company! The equipment worked a dream and everyone has commented on what a great system it is.

Many thanks for your help over the last couple of days – very slick and I look forward to working with you again.

When 'the people' are as good as 'the kit', who is worried!

I absolutely LOVE working with Crystal Interactive. The team are always very flexible and accommodating with our requests. Thank you for making my job easier!

Thank you for making sure it all went smoothly. Thank you in particular for finding quick and practical solutions and for being so calm!

Just a quick note to say thank you for your amazing work last night. Seriously good fun, and the audience lapped it up. Loved all the little extra music stings / clocks / sound effects as well. We have a very happy client, thanks in many ways to you and how smoothly it went last night.

Your work leading up to and during the event was flawless. You did an amazing job keeping track of all of the changes on the day and making last minute changes on the run!
